# ▮maintain.ace

MOBILE SERVICE ASSISTANCE

author

Software component for the creation, editing and provision of maintenance manuals and documents about machines and plants

maintain.ace.author is an editor for creating documentation about a machine – several experts in different locations can use it at the same time.

maintain.ace.author enables the structured capturing of maintenance procedures. For each such procedure, pre-conditions, required competences, tools and supplies can be entered. The maintenance activities to be performed are described step-wise and media-rich – this includes capturing the conditions after a successful maintenance.

Documents are exported to the *maintain.ace.server*, as printable PDF documents or in Web formats for publication on the Internet.

maintain.ace.author is based on the S1000D standard. Being a Java application, the editor can be used on different operating systems..
